### Process:

**Step1:** PPT- (Pre Placement Talk)- Compulsory to attend PPT, if You want to participate in next rounds.

**Step 2:** Programming Test: This is an online test with three programming questions, in coding required, we are looking for logical approach and the algorithm.

**Step 3:** Technical Interview: Based on the outcome of the above test, candidates will further undergo a technical round. This round evaluates the technical ability of the candidate. In most of the cases this will be an individual round but it may be grouped with the formal interview.

**Step 4:** Final HR Round: Final round of the selection process, where the candidate's stability and his confidence level towards the particular work will be evaluated. The interview focuses on overall personality check of the candidate. Once the candidate is selected, will be given an offer letter.

**Job Description:** We are in the hunt for enthusiastic and imaginative developers. Someone who can think laterally to design creative and simple solutions to complex problems. You need to have:

- An analytical mind with strong logical & reasoning ability
- Very good communication skills (verbal and written)
- Good application development skills.
- Strong debugging skills
- Should have a good eye for UI/UX
- A quick learning ability
